Ecological site group 047XESG09
Saline Bottoms

Last updated: 05/02/2023
Accessed: 10/12/2024

Key Characteristics

- Additional water
- Ephemeral water
- Subsurface EC >4

Provisional. A provisional ecological site description has undergone quality control and quality assurance review. It contains a working state and transition model and enough information to identify the ecological site.

Physiography

This ESG is located on oxbows and channels.

Climate

This ESG is characterized by the mesic temperature regime and the aridic moisture regime.

Major Land Resource Area

MLRA 047X
Wasatch and Uinta Mountains

Correlated Map Unit Components

22401171

Stage

Provisional
