---

### Key Characteristics

- Additional water

Provisional. A provisional ecological site description has undergone quality control and quality assurance review. It contains a working state and transition model and enough information to identify the ecological site.

### Physiography

This ESG is located on playa floors.

### Climate

This ESG is characterized by the mesic temperature regime and the aquic moisture regime.

### Vegetation dynamics

The modal ecological site for this ESG is R077BY007NM Swales.

### Major Land Resource Area

MLRA 077B  
Southern High Plains, Northwestern Part

### Subclasses

- R077BY007NM–Swales

### Correlated Map Unit Components

24298754, 24301941, 24100955

### Stage

Provisional
