

Major Land Resource Area 120B

Kentucky and Indiana Sandstone and Shale Hills and Valleys, Northwestern Part

Accessed: 04/24/2024

Ecological site keys

MLRA 120B

I. Uplands

A. Loess ... F120BY001IN – Loess Uplands

B. Fragipan ... F120BY002IN – Fragipan Uplands

C. No Fragipan

1. Depth: Moderately Deep ... F120BY005IN – Moderately Deep Sandstone-Shale Uplands

2. Depth: Deep

i. Deep, Well Drained Sandstone - Shale Uplands ... F120BY007IN – Deep Well Drained Sandstone-Shale Uplands

ii. Deep, Moderately Well Drained Sandstone-Shale Uplands ... F120BY006IN – Deep Moderately Well Drained Sandstone-Shale Uplands

3. Sandy or Loamy Skeletal

i. Loamy Skeletal Uplands ... F120BY008IN – Loamy Skeletal Uplands

ii. Sandy Dune Uplands ... F120BY009IN – Sandy Dune Uplands

II. Upland Flats ... F120BY014IN – Saturated Flats

III. Terraces

A. Well Drained ... F120BY011IN – Well Drained Terraces

B. Moderately Well Drained and SWPD ... F120BY013IN – Moist Terraces

IV. Floodplains

A. Well Drained

1. Loamy Alluvial Headwaters ... F120BY015IN – Loamy Alluvial Headwaters

2. Riverbank Loamy Alluvium ... F120BY018IN – Riverbank Loamy Alluvium

3. Well Drained Silty Alluvium ... F120BY017IN – Well Drained Silty Alluvium

B. Somewhat poorly drained to Moderately Well Drained ... F120BY019IN – Moist Silty Alluvium

C. Poorly Drained ... F120BY020IN – Wet Silty Alluvium
